EXPERIENCE

Senior Designer | Microsoft AI | Edge Growth

Microsoft Corporation 03/2024 - Present Hyderabad, India

- Lead Growth Design for Microsoft Edge across onboarding, activation, retention, personalization, and setup experiences
- Own end-to-end design strategy for Edge's next-generation First Run Experience, one of the browser's most critical acquisition and activation journeys
- Delivered measurable onboarding improvements, including +3.31% 3-week average browser minutes, and 32.2% theme apply rate across Edge onboarding and personalization experiments
- Designed scalable onboarding infrastructure reaching 26M new devices/month, improving setup quality, personalization, and readiness across new Windows device journeys
- Improved browser switching and password import experiences operating at 5.6M+ monthly impressions, helping users complete setup with greater clarity and confidence
- Drive growth initiatives across FRE, Data Import, autolaunch, website pinning, personalization, and post-FRE interventions in partnership with Product, Engineering, Research, Data Science, Content, Privacy, and Motion teams
- Influence product roadmap through design strategy, telemetry interpretation, customer insights, and executive storytelling

AI product Innovation

Microsoft Corporation Hyderabad, India

- Built an AI-powered planning platform that improved planning visibility, prioritization, and execution across cross-functional design initiatives
- Rapidly prototype product concepts using AI-assisted design and development workflows, accelerating idea validation and stakeholder alignment
- Explored AI-driven product concepts across onboarding, growth, productivity, and customer engagement through Microsoft innovation programs
- Applied Generative AI to streamline research, synthesis, prototyping, and operational workflows across design teams

Senior Designer | Windows Auth & Identity | FIDO Alliance Member

Microsoft Corporation 02/2022 - 03/2024 Hyderabad, India

- Designed identity and authentication experiences supporting billions of Windows sign-ins and account interactions across Microsoft's ecosystem
- Advanced Microsoft's passwordless strategy through Windows Hello, Microsoft Account, FIDO, Passkeys, and third-party credential manager experiences
- Helped launch Windows passkey experiences, driving 175K+ passkey enrollments in the first 10 days
- Designed third-party credential manager support for Windows, expanding passwordless ecosystem readiness to 250M+ addressable Windows users
- Led design for Unified Consent experiences powering 1.9B+ cumulative consent transactions and 689M+ consented Microsoft account users
- Led UX strategy for foundational Windows passkey experiences, partnering across Design, Engineering, Security, Product, Compliance, and standards teams
- Identified 80+ SSO issues across 200+ workflows, improving authentication reliability, consistency, and trust across Windows sign-in journeys
- Represented Microsoft through FIDO Alliance and Authenticate 2024, contributing to industry discussions on authentication, passkeys, and passwordless experiences

SUMMARY

11+ years of experience designing Growth, Identity, AI-powered, and consumer experiences across Microsoft Edge, Windows, Microsoft Search, Xbox, and Automotive platforms.

Currently leading Growth Design for Microsoft Edge, shaping onboarding, activation, retention, and personalization experiences for millions of customers. Previously designed large-scale identity, authentication, consent, and passwordless experiences across Windows Hello, Microsoft Account, FIDO, Passkeys, and Unified Consent, supporting Microsoft experiences at global scale.

Recognized for combining product strategy, growth experimentation, systems thinking, accessibility, behavioral design, and AI-assisted prototyping to solve complex customer and business challenges

EXPERIENCE

Product Designer II | Xbox Game Pass Subscription Growth & Retention

Microsoft Corporation 03/2021 - 01/2022 Hyderabad, India

- Led growth and retention experience work for Xbox Game Pass, contributing to 136K new subscriptions and \$15M revenue
- Designed experimentation-led cancellation and lifecycle improvements that retained 130K+ users annually across two retention experiments
- Improved subscription journeys across acquisition, cancellation, plan evaluation, and retention moments, helping customers understand value and continue with Xbox Game Pass
- Partnered with Product, Engineering, Data Science, and business stakeholders to translate growth opportunities into customer-centered subscription experiences

Product Designer II | Microsoft Search Assistance & Intelligence (MSAI)

Microsoft Corporation 2019 - 2021 Hyderabad, India

- Designed AI-powered search and discovery experiences across Outlook, Teams, SharePoint, Bing, and Microsoft 365
- Led UX for Microsoft Search Answer experiences reaching 6.2M monthly users and generating 2.0M successful answer interactions
- Designed and shipped Answer experiences across Acronym, Calendar Event, Link, Knowledge Topic, and Shy Answers, improving answer discovery across Microsoft surfaces
- Contributed to People and profile-card experiences across Microsoft Search and Microsoft 365, helping standardize people information, contact actions, and organizational context
- Defined scalable interaction patterns balancing usability, accessibility, relevance, and platform consistency across Microsoft Search experiences
- Championed inclusive design and accessibility across Microsoft 365 surfaces

Jaguar Land Rover 2015 - 2018 Gaydon, Warwickshire, UK

- Designed next-generation infotainment, connected vehicle, and in-vehicle interaction experiences for premium automotive platforms
- Led UX definition across HMI concepts, interaction models, and design validation
- Collaborated closely with product, engineering, and user research teams to deliver production-ready experiences

Tata Elxsi Limited 2014 - 2018 Bangalore, India

- Designed Human Machine Interface (HMI) experiences for infotainment systems, instrument clusters, and connected vehicle platforms
- Translated business and customer needs into production-ready interaction designs with multidisciplinary teams
- Contributed to concept development, visual systems, and interaction design across multiple automotive programs
